Addendum No.5**

See Below

The purpose of this Addendum is to notify all potential respondents of any changes to the original RFP and to answer questions regarding the RFP. The answers provided in this Addendum hereby amend and/or modify the original RFP Document and Specifications.

All offerors are subject to the provisions of this addendum.

Questions:

1. On Exhibit D, Questionnaire, the agree/disagree under Municipal Waste, 8th question, it states that, "Vendor will determine, provide and maintain in good working condition, the number and type of replacement containers, recycling facilities and equipment to perform the mutually agreed upon currently required services." **Question 1:** Is there a current recycling plan on going at these facilities?

Answer: See table below for recyclable numbers. For UNMMG and SRMC answers for this section are approximate quantities and pick up locations. UNMH and 933 Bradbury currently have this service and numbers are current.

Current recycling program	Facility	Container size	Quantity of Containers	Pick up Locations	Frequency
Yes	UNMH	40 gallon	105	70	Once per week
Yes	933 Bradbury	40 gallon	30	24	Once per week
Not currently but would like to have this service	UNMMG	40 gallon	76	51	50% weekly 50% bi- weekly
Not currently but would like to have this service	SRMC	40 gallon	36	24	Once per week

Included in this answer is the Red Barrel Pick up and volumes: For UNMH - 250 containers each, 55 gallon container, 6 days per week. For SRMC - average is 35 each, 95 gallon containers, daily service (M-F).

2. If so, what type of containers are being used and how many? **Answer: See above chart for recycle data and see answer for red barrel.**
3. At which locations? **Answer: See above chart for recycle data and see answer for red barrel.**
4. On Exhibit D, Questionnaire, the agree/disagree under Municipal Waste, 9th question, it states that, "Collection of recyclable material shall be from a central collection area to be determined by the Facility". Is there such a facility currently in use?
Answer: Currently at UNMH only, the Operating Rooms (OR) has a central collection area pick-up. This is the only area that does this. There are no other facilities or areas that have this service. The desired state would be to have a central collection area for SRMC and UNMMG and have the vendor travel throughout the facilities to collect all containers and bring to the central collection area, and haul off.
5. If so, where is that facility located? **Answer: UNMH OR, 2nd floor, 2211 Lomas NE, ABQ, NM**
6. And, how is that material being moved from the collection area to the recycler?

Answer: Vendor employees are traveling throughout UNMH, once weekly, and take recyclables to the truck for hauling.

7. Finally, I see there is a cardboard baler on site. Is this baler owned by the hospital and is it part of the recycling plan?

Answer: For UNMH yes it is part of the recycling services. The baler is leased. Vendor maintains the PM's and repairs. No other facility has a baler.
