National Immunization awareness month

Vaccines prevent disease

Did you know, getting vaccinated is not only to protect yourself from vaccine-preventable diseases?

Getting vaccinated helps protect some of the most vulnerable babies, children, adults and seniors.

By getting vaccinated, communities can help create a cocooning effect around these individuals who cannot get vaccinated due to their condition or age.

So, do your part and check to see what vaccines you need at your age - Children: [Childhood Vaccine Quiz | CDC](#) or Adults: <https://www2.cdc.gov/nip/adultimmsched/> .

Las vacunas previenen enfermedades en ti y en mí

¿Sabía que vacunarse no es sólo para protegerse de enfermedades prevenibles con vacunas?

Vacunarse ayuda a proteger a algunos de los bebés, niños, adultos y personas mayores más vulnerables.

Al vacunarse, las comunidades pueden ayudar a crear un efecto capullo en torno a estas personas que no pueden vacunarse debido a su condición o edad.

Así que pon de tu parte y consulta qué vacunas necesitas a tu edad - Niños: [Cuestionario sobre las vacunas infantiles | CDC](#) O Adultos: [Herramienta de evaluación de vacunas para adultos | CDC](#).
